Summary

Full Stack Web developer with broad knowledge in Javascript, Node, Rest API, and WordPress. Other skills include animation rendering in software such as Autodesk Inventor and Unity. Exhibits strong skills in diagnosing and troubleshooting hardware and software in an office environment. Quick learner motivated by challenges and a desire to improve and adapt to different environments and scenarios. Strong focus on efficiency, design, and unique aesthetics in user interfaces.

Technical Skills

HTML5, CSS3, JavaScript, React.js, Angular.js, Node, Autodesk Inventor, relational & non-relational databases, Unity, Wordpress.

Projects

Send-Codes - <https://send-codes.herokuapp.com/> | github.com/JoeHancock1995/send-codes

- An app designed for straight-to-the-point and brief code snippets, boilerplates, and other web-development resources. Aimed towards entry-level coders as a replacement to other resources that can be dense and sometimes intimidating.
- **Tools used:** Bootstrap, Contentful, CSS3, Express, Heroku HTML5, JavaScript, MongoDB, Node.js, Passport.js, React.js

Reporganizer - <https://reporganizer.herokuapp.com/> | <https://github.com/JoeHancock1995/reporganizer>

- An app designed for more straightforward Github repository navigation and allowed the user to add and remove tags to each project and organize them. The app also blocks private repositories from being visible. The aim was to enable more intuitive user organization than what Github offered at the time.
- **Tools used:** AJAX, Axios, Bootstrap, CSS3, Express, Heroku, HTML5, JavaScript, JQuery, MySQL, Node.js, Sequelize

Education

Certificate, Full Stack Web Development - UT Austin

Coursework completed towards a Bachelor of Arts in History - Austin Community College & Texas State University

Work Experience

Alliance One Oilfield, Houston, TX

IT management / Web Developer(April 2020 to October 2021)

- Set up and maintained an office network that could connect to offices in Europe, Asia, and North America reliably and securely.
- Deployed major updates to a previously existing WordPress site to improve speed, search engine optimization, and functionality.
- Required quick learning skills to effectively respond to technical issues across a wide variety of software, hardware, and networks I may have been unfamiliar with previously.
- Harnessed creative solutions to minimize disruptions and inconvenience between offices across multiple time zones.

Freelance Web Development

(October 2018 to present)

- Working with clients to create a website that suited their needs while still maintaining a stylish and responsive design and layout.
- Responded professionally to feedback and changes by catering to the client's needs in a quick and well-thought-out manner.
- Utilized different libraries and frameworks such as Angular, React, WordPress, Three.js, and a variety of APIs.
- Used effective communication and research skills to acquire knowledge of the client company so that the project could be catered to their users and achieve desired outcomes.

Petro-Platform, Houston, TX

Animation Intern (October 2017 to October 2018)

- Produced functioning animations for equipment to demonstrate its use to potential customers.
- Used strong communication skills to work with more experienced animators to better understand primary objectives.
- Utilized 3D graphics software such as AutoCAD, Autodesk Inventor, and Unity.
- Worked under professional animators to make sure models and animations were created using best industry practices.
